Safety Culture

Since the founding of NCS in 1981, the company has recognized the importance of safety being a top priority.

SAFETY AS A CORE VALUE

At NCS, Safety is a company core value right along with quality, communication, customer service, and integrity. We care about our team members and believe focusing on risk awareness is key to building a safety-minded culture across the organization. NCS is committed to setting the highest standards in our industry and instilling a positive safety culture by continually educating and training our employees. We strive to seek out and implement ideas and best work practices that will reduce or eliminate hazards for our employees, clients, and our community. At NCS, Safety Awareness begins day 1 with our New Hire Orientation Program, where we help new team members develop the knowledge, skill, and abilities for safety success.
