NCS Intrusion Detection Monitoring Packages

In today's world, security threats are constant, and the cost of false alarms can be just as disruptive as real intrusions. NCS provides intelligent Intrusion Detection Monitoring that ensures responses to actual security breaches while minimizing costly false alerts.

Customized Solutions for Every Business

Our Gold and Platinum Intrusion Monitoring Packages provide advanced alarm detection and real-time alerts to safeguard your property, assets, and most importantly, your people.

Designed for flexibility and efficiency, our intrusion monitoring services adapt to your security needs, allowing you to choose only the essential features or a comprehensive system with advanced oversight.

Additional Bosch Options

Bosch Cellular: Provides reliable communication as either a primary or backup option. If phone lines or networks fail, Bosch Cellular ensures uninterrupted connectivity.

Bosch Remote Connect Mobile: Enables secure, remote access to your system anytime, anywhere. Easily arm/disarm, check system status, manage users, and bypass troubled points.
