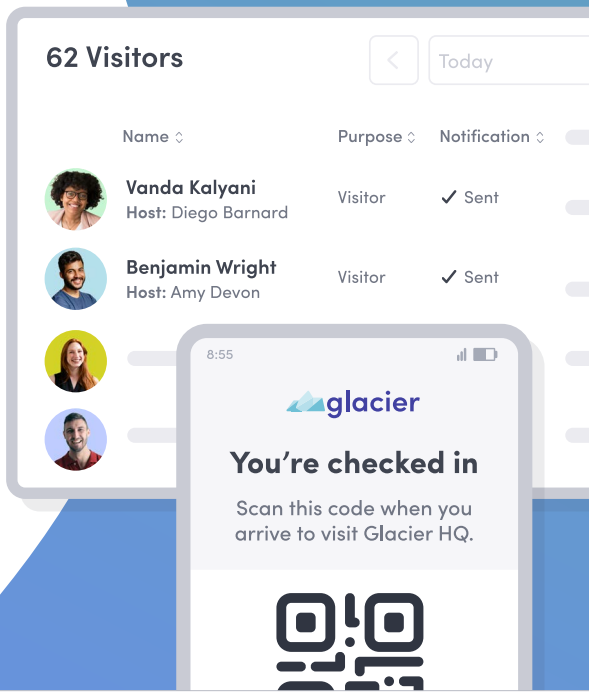
Envoy

ENVOY VISITORS

Proactively manage security threats and compliance requirements

Streamline visitor management with the leading solution that automates everything from ID verification to security screenings—keeping your organization audit ready and secure.



Ensure compliance before a visitor arrives

Automate workflows with Envoy to eliminate manual paperwork and guesswork. Our solution gathers digital documentation and signatures, validates safety and compliance training, supports verifying identity, and screens against multiple sources, including third-party background checks and watchlist or blocklists.

Secure unattended front desks

Facilitate a smooth sign-in process and ensure security and compliance steps, like NDAs, are completed no matter what. With Envoy Visitors, guests can check themselves in by scanning a QR code or leveraging a kiosk, even at sites without staffed front desks.

Expedite emergency response

Track who is present in real time and send multi-channel alerts through SMS, email, and in-app push notifications for quick safety checks and emergency assistance. Envoy lets both employees and guests confirm their safety or communicate their situation during emergencies.

Protect your physical & digital workplace

Manage who has access by connecting Envoy with 100+ apps that support background checks, access control, Wi-Fi credentials, and more. Instantly flag unauthorized guests.

Automate digital records for audit readiness

Keep a detailed record of every visitor at a global and location level and automatically export reports on a set schedule. This saves your team hours of manually logging every person coming and going.

Meet compliance and regulatory standards

Our solution automatically stores visitor data, giving you the essential foundation you need to navigate the complex regulatory landscape and generate easy, audit-ready reports.

ISO · ITAR · FDA · GDPR · PCI · SOC · CCPA · CTPAT · OSHA · FISMA

AVIGILON ALTA · DESCARTES Visual Compliance · Microsoft Azure · cisco Meraki · Microsoft Teams · DocuSign · servicenow · brivo · LENEL·S2 · slack · Honeywell · Genetec · okta

The functionality you need to elevate your visitor management process

Tailor sign-in

Create customized sign-in flows for your facility with ease. You can effortlessly tailor pre-registration and sign-in processes based on visitor type, ensuring all necessary security checks are completed without friction. Visitors can sign in via kiosk, QR code scan, facial recognition, or virtual front desk.

Digital documentation

By automatically providing and tracking required documentation, from NDAs to quizzes and training certifications, Envoy ensures all necessary steps are completed. This reduces risk and enhances compliance for your facilities.

Visitor audit trail

Staying audit ready is simple when Envoy automatically logs every site visit, capturing critical details including visitor type and required documentation. These records create a thorough audit trail that you can access anytime, which is crucial for supporting compliance and enhancing security protocols.

Security integrations

Easily connect your existing technology to Envoy to support email invites, digital NDAs, and access control.

Host communications

Keep your team informed with timely, automated notifications via native communication channels or the Envoy app when their guests arrive.

Identity verification

From ID scanning to cross-checking against internal blocklists and third-party background and watchlists, Envoy ensures you always know who your visitors are.

Badge creation

Instantly print custom badges with photos, date stamps, host names, and company logos upon sign-in. This ensures visitors are easily identifiable, helping you maintain a secure facility.

Emergency notifications

Alert people onsite with automatic notifications across sign-in kiosks and sent via frequently used channels like SMS, WhatsApp, Slack, Microsoft Teams, or email.

Customize permissions

Remove the manual checks and balances of bringing visitors onsite by tailoring internal permissions, roles, and workflows unique to your organization with Envoy.

Thousands of facilities worldwide rely on Envoy to stay secure & compliant

> Most government regulations require us to provide five years of visitor log data. With Envoy, we can go back and see who was authorized to enter a site and who wasn't, so we're prepared when the government comes in. If we don't [use Envoy], there's a significant risk of fines. It's like an insurance policy for us."
