TOWN OF LITTLE ELM
THE LAWN AT THE LAKEFRONT™

AUDIOVISUAL + PHYSICAL SECURITY FOR OUTDOOR ENTERTAINMENT

CLIENT
Town of Little Elm

LOCATION
Little Elm, TX

NCS SCOPE
87,120 sq. ft.

NCS SCOPE
Audiovisual + Physical Security

THE PROJECT STORY

OUTDOOR PERFORMANCE PAVILION

VIDEO SURVEILLANCE

87,120
SQ. FT. COMMUNITY VENUE

4
SURVEILLANCE CAMERAS

10
INTEGRATED SYSTEMS

THE RESULT: A FLEXIBLE, CONNECTED OUTDOOR VENUE

Clear, consistent audio now extends across the lawn while video surveillance improves visibility around the pavilion and venue. Together, the systems give Little Elm a flexible technology foundation for concerts, community programs and public gatherings.

THE CLIENT

Located within Little Elm's Lakefront district, The Lawn at The Lakefront™ is an 87,120-square-foot community destination for outdoor entertainment, recreation and public gatherings. The park includes an event lawn, performance pavilion, playground and shaded gathering areas.

THE CHALLENGE

The Town of Little Elm needed clear, balanced sound across a large open-air lawn for concerts, announcements and community programming. It also needed expanded video surveillance across the new venue, with camera coverage integrated into Little Elm's existing security environment.

THE SOLUTION

NCS designed, installed, programmed and commissioned the pavilion AV system using Bose ArenaMatch loudspeakers, PowerMatch amplifiers, ControlSpace processing and Shure vocal microphones. NCS also installed four Hanwha Vision cameras connected to a Wisenet NVR.

ONE VENUE. INTEGRATED AUDIO AND SECURITY.

NCS combined professional audiovisual and physical security systems to support performances, public programming and day-to-day venue operations.

STRUCTURED CABLING + NETWORK INFRASTRUCTURE

BOSE ARENAMATCH LOUDSPEAKERS
Distributed at the pavilion to provide clear, balanced coverage across the audience area.

POWERMATCH AMPLIFICATION
Bose amplification supports the loudspeaker system and consistent performance for outdoor events.

CONTROLSPACE PROCESSING
Bose ControlSpace processing manages the audio system for flexible event operation.

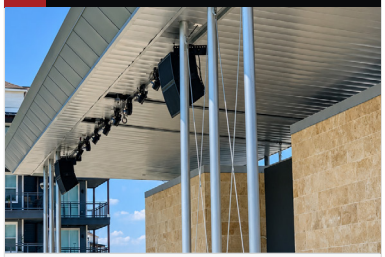
SHURE VOCAL MICROPHONES
Vocal microphones support performers, presenters, announcements and community programming.

ONE INTEGRATED VENUE TECHNOLOGY FOUNDATION

Audio and surveillance work together to support event operations, audience experience and site visibility across the new outdoor venue.

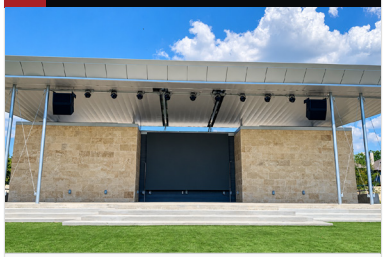
SECURITY + CONNECTIVITY ACROSS THE FACILITY

01 PAVILION AUDIO



Bose ArenaMatch loudspeakers support performance and program audio from the pavilion.

02 LAWN COVERAGE



The system was engineered for clear, even sound distribution across the open-air audience area.

03 LIVE EVENT FLEXIBILITY

Shure vocal microphones support performers, presenters and public announcements.

04 VIDEO SURVEILLANCE

Four Hanwha Vision cameras provide visibility across strategic areas of the pavilion and lawn.

05 SECURITY INTEGRATION

Camera feeds connect to a Wisenet NVR and integrate with Little Elm's existing surveillance environment.

06 INTEGRATED AV + SECURITY

Speakers and surveillance cameras work across the pavilion to support event operations and site visibility.

PLANNING AN OUTDOOR VENUE OR COMMUNITY SPACE?

Contact NCS to plan audiovisual and physical security systems from day one.
